## DucoBox Focus

The DucoBox Focus is a compact, durable and extremely energy-efficient **extractor unit with an integrated control valve system** that relies on CO<sub>2</sub> and humidity measurements, developed for use in Duco's Demand-driven Natural Ventilation Systems (DDNVS) which extracts moist and/or stale air zonally as required and at the correct rate.

The DucoBox Focus uses just one PCB for both control and operating electronic systems. Simple design and an efficient DC motor ensure long service life.

### Physical characteristics
