

DucoFlex

Complete **air duct system** for MEV and MVHR

DUCO

We inspire at www.duco.eu

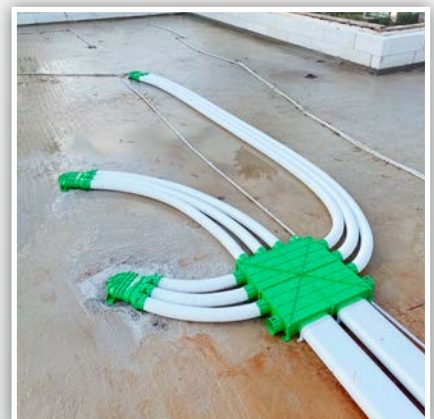

COMPLETE VENTILATION PACKAGE

Since the arrival of the DucoFlex air duct system, DUCO is evolving into a total ventilation solutions provider. From vents to ducts and including a complete range of ventilation boxes. In short, the ventilation specialist has all you need in-house for a **high-quality residential ventilation system**.

This consists of the highest airtightness class D, the lowest air resistance and maximum acoustic comfort with the quietest ventilation boxes in Europe! The result is an **energy-efficient and quiet** ventilation system.

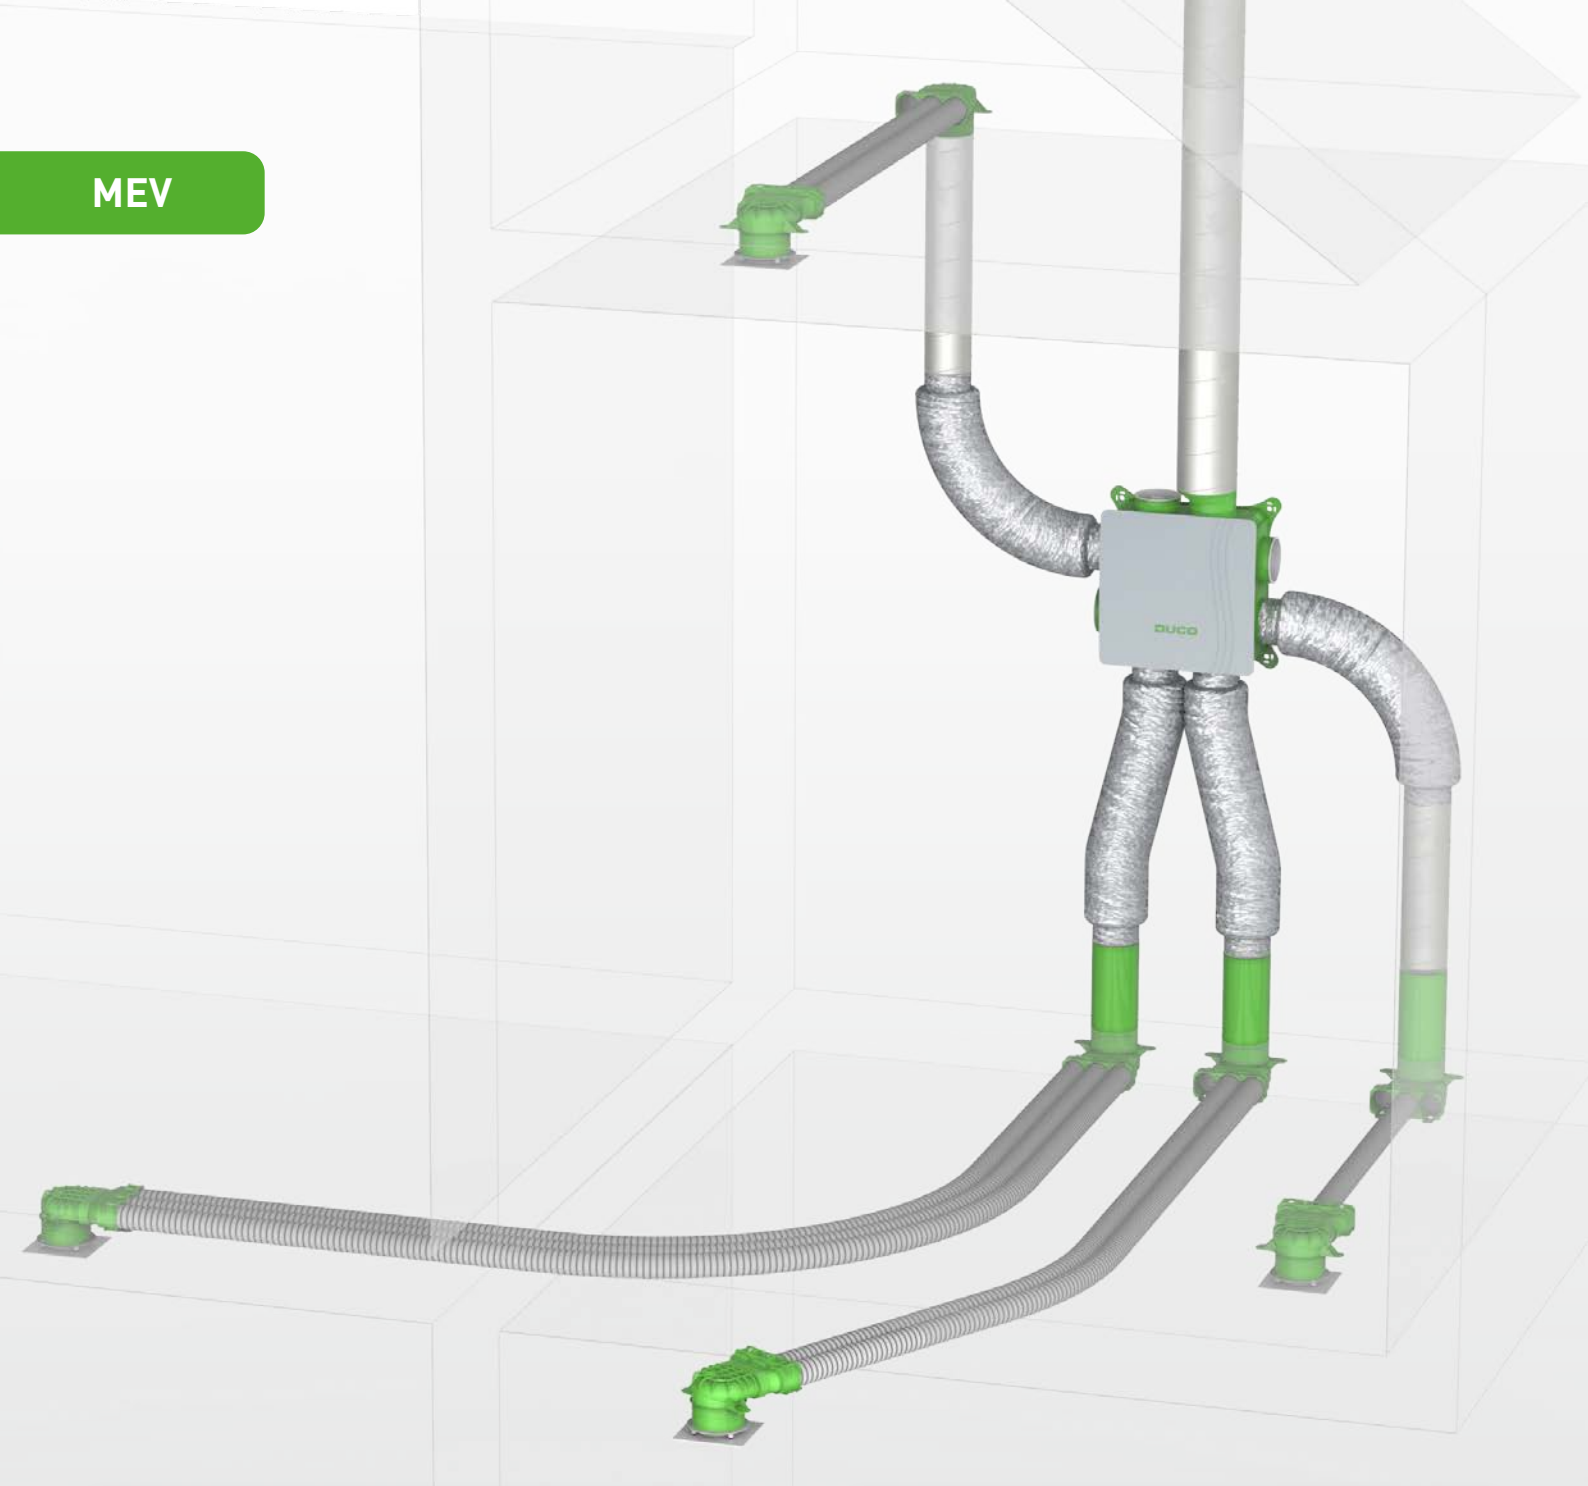

Did you know that this complete air duct system **for MEV and MVHR** is very easy to install? This is thanks to the handy 'Click & Go' principle and minimum number of fittings. DUCO as a one-stop-shop with **100 % service provision!**

Video DucoFlex

MEV

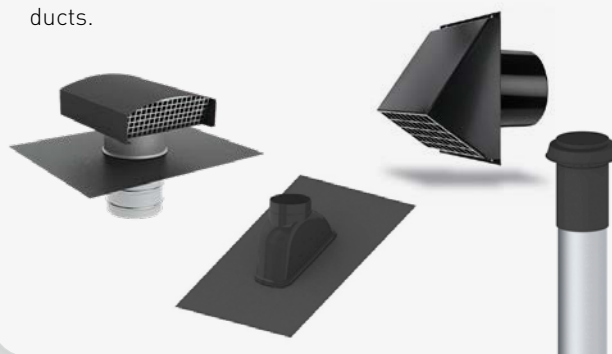

Supply and exhaust vents

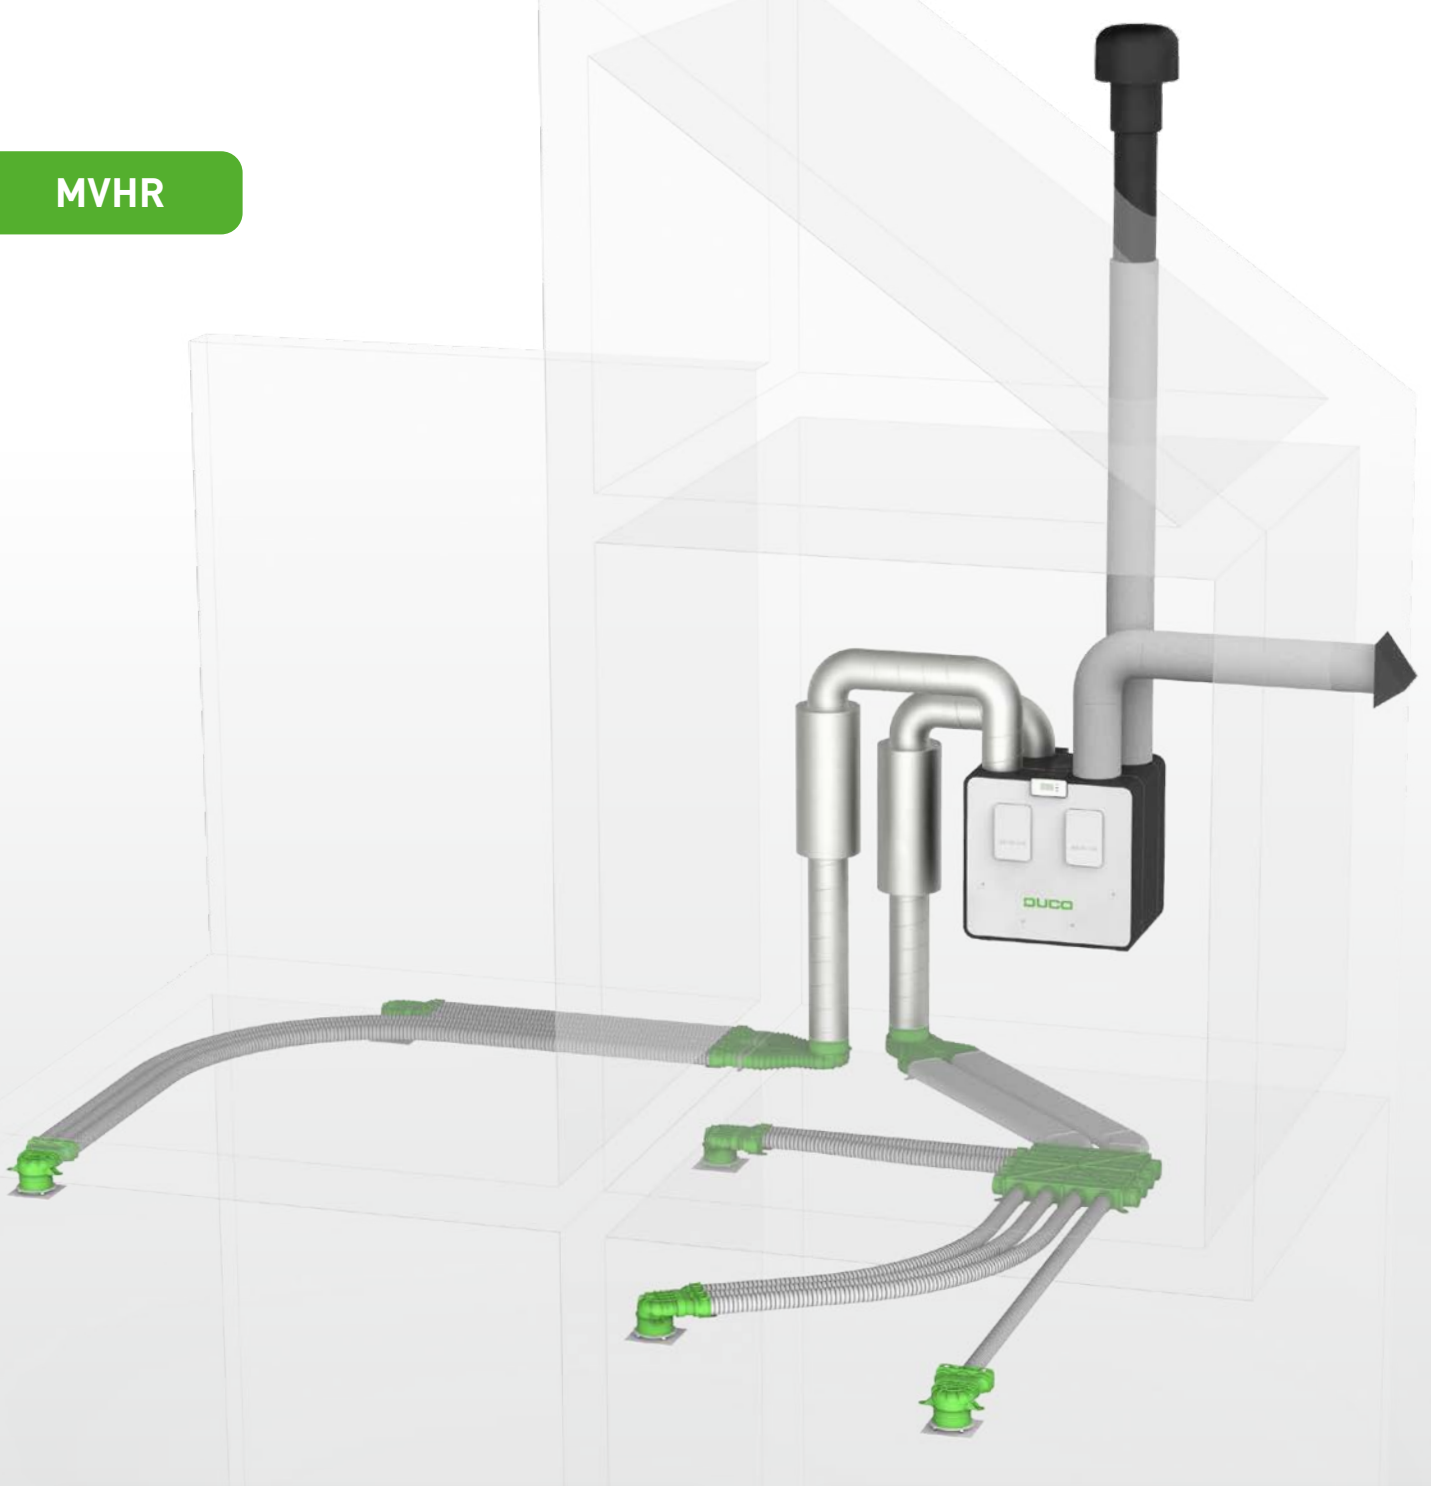

A wide range of **supply and exhaust vents** with a fitting diameter of $\text{\O}125$ mm. DUCO vents distinguish themselves through simple calibration, fast installation, aesthetics, acoustics and easy maintenance ...

Wall and roof feed-through

A complete range of roof and wall feed-throughs, available in different materials and colours. The connection diameters of $\text{\O}160$, $\text{\O}180$ and $\text{\O}200$ mm are in line with that of most conventional riser ducts and DucoFlex insulated ventilation ducts.

Silencers

Flexible or rigid sound attenuators that have pre-fitted connectors. Due to their acoustic damping characteristics, sound absorbers are an indispensable element in the DucoFlex range.

Insulated ducting

The range of insulated EPP and EPS ducts with a diameter of Ø160, Ø180 or Ø200 mm are simple to connect to DUCO's air duct system. With a limited number of parts, it is easy to create a thermally **insulated connection** between the ventilation unit and the roof/wall feed-through.

**AIRTIGHTNESS
CLASS D**

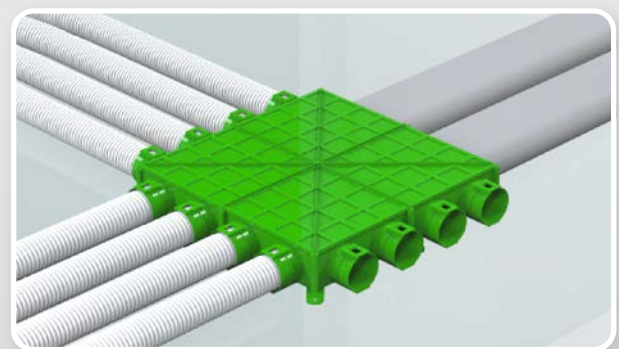

'Click & Go' system

- Handy click system
- Minimum parts and fittings
- Save time = save money

'Enjoy the silence'

- Airtightness class D
- Low air-resistance
- Maximum comfort

100 % service

- Support from the research department
- One-stop-shop:
1 brand = 1 ventilation solution
- Start Up Service for calibrating the ventilation system

Complete Air Duct System

- One solution for every type of ventilation system
- Suitable for MEV and MVHR
